

Spanish: Retratos Portraits

Grammar

- Making simple statements (about appearance)
- Giving a simple description (of a person)
- Adjectives: agreement and position.
- tener: él/ella tiene (to have: he has-she has)

Culture

Pablo Picasso

In 1907, Picasso created with painter and sculptor Georges Braque the brand new art movement known as "Cubismo". Cubismo allowed the artist to show his/her model from many different viewpoints. In the paintings of earlier times, the artist showed his subject from one particular viewpoint. In cubist paintings the artist may show the front and the side of a person's face at the same time.
